

# Smart Solutions for a Greener Restaurant

As a restaurant owner/manager, you need to concentrate on the menu and guest satisfaction.

City ordinances continue to be enacted that ban certain traditional products such as plastic straws, plastic bags, foam containers and cups.

We know you do not have much time to spend on figuring this all out. What are your options? How much will they cost? What is the impact?

Greensafe Specialists are available to help you navigate these ordinances and sustainable solutions in general. There is a lot of "greenwashing" in the marketplace and some companies are selling products with false claims.

Imperial Dade's Greensafe Specialists can be trusted to provide sound advice. Why? Because we know the restaurant industry and have access to truly sustainable product options.

This service is complimentary. Sure, you could hire someone who claims to know about sustainability, but why do that when you can rely on your industry partners from Imperial Dade?
